

# TRENTO

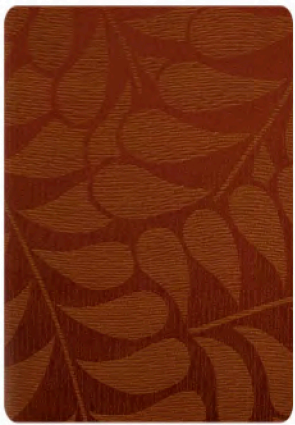

Estos textiles cuentan con un acabado Retardante a la Flama.

El material ignífugo es aquel que posee o proporciona índices de inflamabilidad y propagación del fuego.

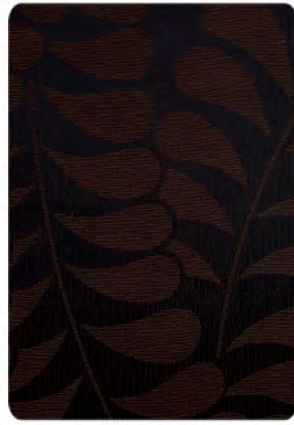

Reducen la inflamabilidad de los materiales mediante el bloqueo del fuego de manera física o iniciando una reacción química que lo extingue.

La real academia española define: ignífugo, ga.  
(Del lat. ignis, fuego, y -- fugo).  
adj. Que protege contra el fuego.
